-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. All details of the translated specification have not been checked to the extent necessary to determine the presence of all possible minor errors, such as may be present after translation. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Additionally the abstract of the disclosure is objected to because it is too lengthy (approx 293 words) and it contains the word "said" (at least in line 13).

Applicant is reminded of the proper language and format for an abstract of the disclosure:

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet **within the range of 50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. **The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided.** The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Irsch, U.S. Patent No. 6,032,809.

Irsch discloses a structurally equivalent multi-axle movable crane configuration (see Figs. 5a-5e) which includes *at least* a semi-trailer tractor (2) with a receiving hitch part (16) connected to a roller head (49), the roller head (49) being operably connected to a telescoping section (48) having a main jib (21) and a basic jib (23), and further, a telescopic crane (40) having a truck (42), a crane cab (46), a superstructure (45), a drivers cab (44) and a rail (54).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: The prior art cited on form PTO-892 relates to multi-axle movable cranes with booms.
